Please find below and/or attached an Office communication concerning this application or proceeding.

		Applicatio	Application No. Applicant		nt(s)				
Office Action Summary		10/783,43	4	NICHOLSON, PETER					
		Examiner		Art Unit					
		Gregory C		3662					
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1)	Responsive to communication(s) filed or	າ							
2a)□	This action is FINAL . 2b)	This action is no	on-final.						
3)	Since this application is in condition for a	allowance except	for formal matters, pro	secution as to the	e merits is				
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Dispositi	on of Claims								
4)🖂	4)⊠ Claim(s) <u>1-61</u> is/are pending in the application.								
	4a) Of the above claim(s) is/are withdrawn from consideration.								
5)□	5) Claim(s) is/are allowed.								
6)□	Claim(s) is/are rejected.								
7)	Claim(s) is/are objected to.								
8)⊠	8) Claim(s) <u>1-61</u> are subject to restriction and/or election requirement.								
Applicati	on Papers								
9) The specification is objected to by the Examiner.									
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.									
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).									
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).									
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.									
Priority u	ınder 35 U.S.C. § 119								
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:									
	1. Certified copies of the priority documents have been received.								
	2. Certified copies of the priority documents have been received in Application No								
3. Copies of the certified copies of the priority documents have been received in this National Stage									
application from the International Bureau (PCT Rule 17.2(a)).									
* See the attached detailed Office action for a list of the certified copies not received.									
Attachmen									
	e of References Cited (PTO-892) e of Draftsperson's Patent Drawing Review (PTO-9	948)	4) Interview Summary (PTO-413) Paper No(s)/Mail Date						
3) Infon	nation Disclosure Statement(s) (PTO-1449 or PTO r No(s)/Mail Date			ormal Patent Application (PTO-152)

Art Unit: 3662

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-32 and 38-61, drawn to a method, apparatus, and program for compiling assistance data by determining on the basis of a criterion the satellites to be used for position determination, classified in class 342, subclass 357.15.
 - II. Claims 33-34, drawn to a method for transmitting assistance data on the basis of an assistance data dataset, classified in class 342, subclass 357.09.
 - III. Claims 35-37, drawn to a method for transmitting assistance data in response to receiving an initial dataset and excluding assistance data therefrom, classified in class 342, subclass 357.09.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions I and II/III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the reception of an initial assistance dataset nor exclusion of assistance data from said set. The subcombination has separate utility such as merely a relay/repeater base station of a cellular communication network that does not require any determination of potentially visible satellites nor the determination on the basis of any predetermined criterion of selected/excluded satellites, nor the selection of satellites to be used in a position determination nor the compilation of any assistance data.
- 4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions ***.

Application/Control Number: 10/783,434 Page 3

Art Unit: 3662

5. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method of transmitting assistance data regarding all potential candidates of visible satellites. See MPEP § 806.05(d).

- 6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II/III, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 8. Furthermore, this application contains claims directed to the following patentably distinct species of the claimed invention:
 - determination of the likelihood on the basis of the angle of elevation of a satellite.
- (2) determination of the likelihood on the basis of a terrain indicator indicative of the terrain assigned to the geographical area,
 - (3) determination of the likelihood on the basis of a elevation model of a geographical area,
- (4) determination of the likelihood on the basis of the geometrical spread of potentially visible satellites in the sky,
- (5) determination of the likelihood on the basis of historical data relating to the probability of a mobile terminal achieving a successful location determination,
- (6) determination of the likelihood on the basis of a plurality of criteria selected from the group of angle of elevation, terrain indicator, elevation model, geometrical spread, and historical data.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 3662

Currently, claims 1, 16, 22, 24, 28, 38, 41, 45, 47 and 56 are generic to the first invention, claim 33 is generic to the second invention and claim 35 is generic to the third invention.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory C. Issing whose telephone number is (571)-272-6973. The examiner can normally be reached on Monday - Thursday 6:00 AM- 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Thomas Tarcza can be reached on (571)-272-6979. The fax phone number for the organization where
this application or proceeding is assigned is 571-273-8300.
